Samples are for representation only; colour depth and tone may vary significantly with the type of wood and application.

Before a floor is stained, the end customer should be shown samples of the colour with the original wood used on the floor. The stain can only simulate the colour of the exotic wood. The colour, structure and porosity of the wood used, as well as the fineness of the sanding, will be determined by the type of wood used, even after staining and have a very significant effect on the final colour.

Please observe Technical Information prior to use.

Natural colour effects with vegetable oils

LOBASOL® HS 2K ImpactOil Color is a two-component high solid oil based on vegetable oils – solvent-free and with a solids content of 100%. This oil brings out the wood's pleasant warmth and natural appearance, enhancing its unique grain and beauty. The use of a hardener creates a surface that is extremely durable and resistant to water stains. The system can be used for an extremely wide range of applications, such as private homes, spa areas, public buildings, commercial establishments etc.

- Wide variety of colours: 19 attractive stains (can be mixed to create additional colours)
- Wide range of applications: exceptional resistance to water stains, therefore also well suited for use in bathrooms, kitchens and other rooms with higher humidity
- Beautifully natural matt appearance
- Extra safety due to the higher slip-resistance rating of R10 in accordance with BGR 181 and DIN 51130
- Suitable for children's toys as per DIN EN 71-3
- Natural: high-solid oil based on vegetable oils

LOBASOL® HS 2K ImpactOil has been used around the world for years in a wide variety of applications, including heavily trafficked floors. The partial renovation of floors without sanding is also possible.

Enhance the play of colours with the reactive stain LOBASOL® ActiveColor and the pigment stain PreTone – All colours can be mixed with each other

LOBASOL® ActiveColor reactive stain

- Available in grey and brown
- Waterborne
- Enhances the wood's structures and grain
- Intensive contrasts
- Lively surface appearance
- Rustic look
- Antique effect (vintage)
- Suitable for oak and other tannin-containing woods
- Countless colour combinations

LOBASOL® PreTone pigment stain

- Available in white, black and brown
- More intense colour effects, especially with light colours
- Reduced oil-specific yellowing
- Solvent free
- Neutral odour
- Countless colour combinations

In accordance with the current version of the TRGS 617 (German Technical Regulations for Hazardous Substances), solvent-free high-solid oil systems can be used as substitute products for systems with high solvent contents. Products marked with the GISCODE 0 10/DD+ are solvent-free. The plus symbol [+] indicates that the product contains no MEKO (methyl ethyl ketone oxime) and only safe ingredients for antiskinning agents are used.

19 colour oils* in combination with 5 different stains – for design possibilities as individual as your customers
